Riya Marwaha

Financial Risk Analyst

Location: CA | Mobile: 209-233-0153 | Email: riya.m@myhotmail.net

SUMMARY

Financial Risk Analyst with 4+ years of experience across financial analysis, operational risk management, regulatory compliance, and internal controls. Skilled in SQL, Advanced Excel, Power BI, financial variance analysis, Key Risk Indicators (KRIs), Risk and Control Self-Assessment (RCSA), and automated risk reporting.

SKILLS

Financial Analysis & Planning: Financial Performance Analysis, Budgeting & Forecasting, Variance Analysis, Financial Statement Analysis, Financial Ratio Analysis, Cash Flow Analysis, Profitability Analysis

Risk Management & Assessment: Financial Risk Assessment, Operational Risk Management, Risk Exposure Assessment, Risk Modeling, Scenario Analysis, Key Risk Indicators (KRIs), Root Cause Analysis

Risk Reporting & Compliance: Regulatory Compliance, Regulatory Risk Reporting, Risk and Control Self-Assessment (RCSA), Internal Controls Testing, Risk Register Management, Compliance Monitoring

Financial Reporting & Controls: Financial Reporting, Management Reporting, Account Reconciliations, General Ledger Analysis, Month-End Close Support, Internal Controls

Data Analytics & Tools: Advanced Excel, PivotTables, XLOOKUP, SQL, Power BI, Data Visualization, Dashboard Development, Reporting Automation, Data Validation

Business & Stakeholder Analysis: KPI Monitoring, Trend Analysis, Financial Data Analysis, Stakeholder Communication

EXPERIENCE

Morgan Stanley, CA | Financial Risk Analyst **Feb 2026 - Current**

- Engineered a monthly portfolio variance analysis framework using Python (pandas, NumPy), SQL (CTEs, joins), and Advanced Excel for a $2.5B+ institutional equity portfolio, reducing reporting turnaround time by 40% and saving 15+ hours monthly.
- Developed interactive Power BI variance dashboards for 8 internal desks, standardizing management reporting and reducing manual consolidation errors.
- Established a centralized Key Risk Indicator (KRI) monitoring framework covering 30+ operational risk metrics, reducing risk response time by 25%.
- Automated SQL-based data validation and exception monitoring to support Power BI risk heatmaps and escalation workflows, enabling early identification of potential control issues across 15+ cross-functional stakeholders.
- Streamlined Global Risk Committee reporting and escalation tracking, achieving 100% on-time escalation coverage and improving visibility into outstanding risk and control issues.

Virtual Infotech Solution, India | Compliance & Risk Analyst **Aug 2021 – Dec 2023**

- Executed Risk and Control Self-Assessment (RCSA) cycles across 45+ banking business units, mapping regulatory requirements to business risks and internal controls.
- Built a centralized operational risk register and control testing matrix using Advanced Excel, PivotTables, and VBA, documenting 150+ operational risks and identifying 12 key control deficiencies.
- Standardized compliance monitoring and reporting workflows, maintaining 100% on-time regulatory submissions across four consecutive client audit cycles.
- Implemented SQL-based financial control validation to reconcile 250+ monthly ledger accounts, improving exception detection and reducing manual reconciliation effort.
- Accelerated month-end close support by 4 business days through SQL validation scripts and automated exception-reporting templates.
- Enhanced general ledger reconciliation by automating the matching of ledger entries against external data feeds, improving data accuracy and strengthening financial control validation.

EDUCATION

Master of Business Administration (MBA) in Business Analytics **Dec 2025**
University of Massachusetts Dartmouth, Dartmouth, MA

Bachelors in Accounting and Finance **May 2023**
University of Delhi, Delhi, India

PROJECTS

Fraud Transaction Detection | R, Data Mining, Predictive Modeling

- Developed and evaluated Logistic Regression, Random Forest, and XGBoost models for fraud detection, reducing misclassification error from 40% to 23% and achieving 77% accuracy.

Financial Modeling & Valuation – Heinz | Excel, DCF, WACC, Sensitivity Analysis

- Built an Excel-based discounted cash flow (DCF) valuation model incorporating WACC, capital structure assumptions, and discount-rate sensitivities to evaluate valuation outcomes.
- Conducted sensitivity analysis on beta, equity risk premium, and tax-rate assumptions, identifying a 24% valuation range and supporting a hold recommendation.

Scenario Modeling & Hedge Analysis – JetBlue | Scenario Analysis, Stress Testing, Risk Management

- Evaluated fuel-hedging effectiveness across crude oil, heating oil, and crack-spread benchmarks under multiple price scenarios to assess operating costs and margin exposure.
- Recommended a 40–60% hedge ratio after stress-testing positions under ±30% price shocks to balance cost stability and margin protection.

Portfolio Risk & Performance Analysis | Excel, CAPM, Fama-French Models, Portfolio Optimization

- Applied CAPM and Fama-French factor models to analyze portfolio returns, identify key performance drivers, and assess factor exposures across a multi-asset portfolio.
- Evaluated portfolio strategies and recommended a passive benchmark approach with 15% lower projected tracking error and comparable risk-adjusted returns.

Policy Impact Analysis | R, Difference-in-Differences (DiD), Data Visualization

- Cleaned and transformed panel datasets in R and applied Difference-in-Differences regression to evaluate policy effects.
- Identified a statistically significant post-policy change ($p < 0.05$), with consistent effects across subgroups.

Investment Portfolio Simulation & Analysis | Excel, Financial Reporting, Risk Analysis

- Managed financial reporting and risk analysis for a simulated $1M equity portfolio, developing dashboards to support data validation, reconciliation, and portfolio risk assessment.
